MEDIA RELEASE

Official Lighting of the New Christmas Tree Lights
Village Green, Longford

The Northern Midlands Council is very excited to announce that on Friday, the 15th of December 2017 we will be officially switching on the new Christmas tree lights located at the Village Green in Longford.

The official lighting will take place from 8:45pm (light permitting) and will include music and a professionally curated light show which will run for 15 – 20 minutes initially and will then be repeated for the remainder of the evening.

The Northern Midlands Council is proud to announce that the Christmas tree on the Village Green in Longford is currently the first location to host this technology in the whole of the Southern Hemisphere. The new lighting system that Council has chosen has the ability to develop and edit new lighting shows and effects that will allow us to use the system all year round for special events and days. LED lighting systems like this are used in large scale arena performances and most recently, on The Voice Australia.

We will also be joined by a variety of food trucks that will be making the trip out to Longford for this very special occasion so come along, bring a picnic blanket and join us for an unforgettable event.

The Northern Midlands Council is once again very proud to be leading the way with this new technology and the capacity to offer it to our community. We hope to see you there to celebrate our new Christmas tree lights and the holiday season.

On behalf of the Northern Midlands Council, I wish you all a very Merry Christmas and a Happy New Year.

ENDS
